HERE ARE SOME QUESTIONS TO CONSIDER THAT WILL TAKE YOU ONE STEP CLOSER TOWARDS A FULFILLING CAREER IN PUBLIC HEALTH.

Q. What roles do you aspire to, and why?
Q. What impact do you hope to achieve through your work?

In Asia, more than 4 billion people stand to benefit from the contributions of Public Health.

A LIVING CLASSROOM …IN THE HEART OF ASIA

The National University of Singapore (NUS) established the Saw Swee Hock School of Public Health (SSHSPH) on 1 October 2015.

Located in Singapore, a regional hub of innovation, and with international influence, the School of Public Health and Tropical Medicine (SPHTM) at NUS was well positioned to lead the way.

The School is well positioned to lead cutting-edge research, with more than 160 faculty members from diverse fields working together to make world-class contributions. Some of the key activities that SPHTM graduate students can gain practical experience are:

1. Lead the SPHTM’s Student Week on Business: Students can join the Business program to learn about entrepreneurship and the business world.
2. Join the SPHTM’s Student Week on Science: Students can join the Science program to learn about research methodology and scientific writing.
3. Participate in the SPHTM’s Student Week on Policy: Students can join the Policy program to learn about policy-making and implementation.

SPHTM students can contribute to PUBLIC HEALTH:

- Global Health: Developing countries
- Epidemiology: Understanding the spread of disease
- Biostatistics: Analyzing data to make informed decisions
- Health Economics: Evaluating the cost-effectiveness of healthcare interventions
- Social Medicine: Understanding the social determinants of health
- Public Health Practice: Implementing strategies to improve health outcomes

PROFESSIONAL AMBITIONS:

1. Public Health Specialist: Developing and implementing policies to improve health outcomes
2. Epidemiologist: Conducting research to understand the spread of disease
3. Biostatistician: Analyzing data to support decision-making
5. Social Medicine Specialist: Understanding the social determinants of health

How can I support an ageing population?

How can I discourage cigarette smoking?

How can I tackle obesity and diabetes?

How can I use social media to promote healthy habits?

How can I reduce barriers and improve access to healthcare?

The PhD programme has allowed me to work closely with experts in the field of Public Health, and to gain a deep understanding of the latest research and trends. I have been able to develop a strong network of contacts in the field, which has been invaluable in my professional development.

My research focuses on the development of innovative solutions to address global health challenges. I am passionate about using my knowledge and skills to make a positive impact on society.

The Saw Swee Hock School of Public Health is a leading institution in the field of Public Health, and I have been able to benefit from the expertise of world-renowned faculty and researchers.

I am excited to return to my home country of Bhutan and use my education and skills to make a difference in my community. I am determined to improve the health outcomes of my fellow citizens and help build a better future for my country.

I have a strong interest in the field of Public Health, and I am committed to making a positive impact on society. I am excited to use my education and skills to contribute to the development of innovative solutions to address global health challenges.
