JOIN A CARING COMMUNITY...THAT CARES FOR THE COMMUNITY.

In many ways, what you do have done for someone is really all that matters. Public Health professionals are the kind of people who...or how to identify and solve public health problems to improve the health of communities.

COMMUNITY CARES FOR THE COMMUNITY…THAT JOIN A CARING PRACTITIONER.

THE PRACTITIONER PROJECT CAN BE:

a) A report that describes the nature of a Public Health problem and analysis of the factors underlying it to a practitioner/health care agency.
b) A statistical analysis of a specific health policy question (including the key factors associated with the outcome).
c) A critical analysis of a health policy or societal issue.

Epidemiology and in-vivo demographic determinants...to influence a problem and its intervention including:

- Chronic disease risk factors
- Occupational hazards
- Tobacco control
- Substance abuse
- Ambulance service management (April 2013). Amongst other topics we would like to discuss in the Practitioner Project.

Masters of Science (MSc) / Doctor of Philosophy (PhD)

Masters of Science (MSc)

- 2 years of full-time study
- Admission to either the Full-time or Part-time (PT) stream.

Doctor of Philosophy (PhD)

- 3 to 5 years of full-time study
- 2 years of PQE
- Students who wish to transfer to the PhD coursework requirements, and need to complete the PQE within 2 years.

MSc students who wish to transfer to the PhD coursework requirements, and need to complete the PQE within 2 years.

We encourage students to identify their key options and implications for their future careers. For example, students may choose to receive advanced training in one of the following domains of Public Health research: Biostatistics & Modelling, Epidemiology, and Health Systems & Behavioural Sciences.

MSc students to recognize the net of health research and practice, and defend their thesis.

PhD students will execute the rest of the coursework requirements, and defend their thesis.

The stated maximum candidature applies to both full-time and part-time students.

The minimum and maximum candidature requirements...

- Bachelor’s Degree with Honours (at least 2nd Upper Class) or its equivalent in a relevant discipline;
- MBBS or its equivalent;
- Bachelor of Dental Surgery or its equivalent.

- Non-qualified candidates are recommended.

FROM THE GRADUATE PROGRAMMES

- Academic requirements
- English proficiency requirements
- Residency requirements
- Fees

How can I promote workers’ well-being and safety in the workplace?
How can I support an ageing population at large?
How can I tackle obesity and diabetes?
How can I reduce barriers and improve access to healthcare?
How can I prevent and control the spread of HIV-AIDS and other infectious diseases?

To make a positive impact on the health of others, health professionals must be prepared to make a real difference. Exciting new opportunities now exist for public health graduates from diverse professions to make a difference. The Saw Swee Hock School of Public Health prepares tomorrow’s leaders for the twenty-first century through a comprehensive curriculum that ultimately prepares graduates for exciting and challenging careers.

To find the best solutions, teams of individuals need to combine their skills and knowledge by assessing and understanding socio-environmental factors that lead to disease, and then identify effective solutions. This is why SSHSPH takes a modern approach to professional education – students discover rather than merely receive facts and information. It also has given me specific skills that will be useful in my current work. The NUS MPH programme has broadened my view on what ‘Public Health’ entails and taught me to appreciate the context through an Asian lens.

I want the MPH programme to be a catalyst for change. I want to lead and empower others to appreciate the big picture. By appreciating the context through an Asian lens, we can better understand and develop the right solutions to address public health issues. I am excited to return to my home country and develop the right solutions to address public health issues.

Located in Singapore, a regional hub of innovation, and with international links to the London School of Hygiene and Tropical Medicine, Harvard University and The Karolinska Institutet, SSHSPH is well positioned to lead cutting-edge research.

The MPH programme has broadened my view on what ‘Public Health’ entails and taught me to appreciate the context through an Asian lens.

A BETTER WORLD
TAILORED TO FIT
WHERE OUR GRADUATES ARE CONTRIBUTING TO PUBLIC HEALTH…

Q. What impact do you hope to achieve through your work?
A. I hope to help strengthen my country’s healthcare system and contribute to the advancement of healthcare services.

Q. What roles do you aspire to, and why?
A. I aspire to be a leader in the healthcare sector and contribute to the development of the country’s healthcare landscape and public health initiatives.

See what our SSHSPH alumni have to say...
