Postdoctoral Research Fellow – Chronic disease and rehabilitation

Job scope
The incumbent will support the Principal Investigator on clinical and population studies related to chronic diseases and rehabilitation, with a focus on diabetes.

The Research Fellow will participate actively in research projects in one or more of the following areas

- Conduct and coordinate clinical or epidemiologic research under the direction and supervision of the Principal Investigators and Collaborators, including preparing applications for ethical approval, data collection and management
- Manage these research projects in a team-based, cross functional research environment, which include supervising/mentoring junior research staff and research students
- Support analysis and interpretation of research data
- Draft manuscripts for publishing research outcomes in appropriate journals of international standing and to publish and disseminate the results of research in other reputable outlets
- Support in grant writing
- Attend and present research findings and papers at academic and professional conferences
- Draft research reports for Principal Investigator
- Attend project meetings and to participate (where necessary) in other meetings
- Ensure compliance with health, safety and ethical guidelines in all aspects of work
- Undertake any other specific roles and management functions as may be reasonably required by the Principal Investigator

The incumbent will also be encouraged to introduce new ideas and projects, and work independently.

Duration
This is a full-time 1-2 year position, depending on project commitments and candidate’s career objectives.

Minimum requirements

- PhD in public health, epidemiology, health services research, health information science or related fields
- Track record of publications in international peer reviewed journals
- Demonstrate strong leadership, written and oral communication and interpersonal skills
- Ability to work independently as well as in a team-based, cross functional research environment
- Individuals who do not hold a PhD but have significant relevant research experience are welcome to apply and may be considered albeit at the level of Research Associate with experience
Recruitment is open immediately, and will continue until the position is filled.

Interested applicants should send the following documents by email to Ms Sharon Lee at ephlsy@nus.edu.sg:

a. Cover letter highlighting career goals and relevant experience
b. Curriculum Vitae
c. Names and contact information of at least two referees
d. A completed NUS Personal Data Consent for Job Applicants (form is available at [NUS Personal Data Consent for Job Applicants](NUS Personal Data Consent for Job Applicants))
e. Any other supporting documents

Please ensure you state the name of the position you are applying for in the subject header of your email. We regret that only short listed candidates will be notified.
